

Boston Park Plaza

📍 Dubai, UAE

☰ Unity Full Height HPL

Clean lines and a contemporary design

The project.

Renowned for being one of the best hotels in Boston, the Park Plaza has been fully restored and reimaged through a \$100 million landmark renovation.

The project included Boston Park Plaza gaining an additional 6,000 square feet of fully-renovated professional meeting and pre-function space.

Designed by Sudbury, Mass-based Parker Torres Design, Inc., Boston Park Plaza now evokes a modern feel with a sophisticated grey and white colour palette throughout.

The challenge.

Hand-selected by preferred Hotels & Resorts to be part of its newest experience within its Lifestyle collection, it was imperative that the new meeting room washrooms fitted seamlessly with the charisma and individual charm of this historic hotel.

The solution.

To match the new modern feel of the hotel, Unity toilet cubicles were specified for their clean lines and contemporary design, featuring flush fronts and set back pedestals to give the illusion of a floating appearance, visually creating a big impression.

Manufactured in High Pressure Laminate (HPL) with 35mm doors and pilasters, panels are heat, scratch and impact resistant, perfect for the hotel's high traffic environment. This will ensure the hotel's new restrooms stand the test of time.

Boston Park Plaza is renowned for its dignitary guests, such as Winston Churchill and President Franklin Roosevelt and with this in mind, maximum privacy was essential.

Our Unity toilet cubicles were supplied in full height with a 20mm ceiling clearance and a 50mm floor clearance, ensuring the maximum amount of coverage.

We're thrilled to have been involved in this project, delivering durable restroom stalls to the hotel's guests and staff.
