

NEXUS Club

New York, USA

Sylan Solid Surface

Cutting edge design,
refined aesthetics and
superb craftsmanship

The project.

Located in Tribeca, NEXUS Club New York is a 34,000 square foot private membership club offering perfectly matched services, spaces and amenities for families, friends, colleagues and celebrities. The aim of this project was to provide stylish restrooms that reflected the Club's simplicity in urban sophistication and design.

The challenge.

NEXUS Club New York is a gathering place for family and friends; and the the footfall is set to be high.

A durable restroom solution that could be easily maintained and kept clean was necessary, guaranteeing a long lifespan whilst not compromising the Club's stunning 5 star look and feel.

The solution.

As such a prestigious project, European Cubicles recommended Venesta's full height Sylan Solid Surface range to Morris Adjmi Architects for the Club's fitness and wellness centre restrooms. This luxury restroom cubicle range guaranteed cutting edge design, refined aesthetics and superb craftsmanship. European Cubicles specified "White" full height, flush cubicles for the project.

Solid Surface is a man-made, durable material composed of minerals and acrylic polymer that can be thermoformed into one continuous piece, giving these cubicles a contemporary, minimalist design. Sylan's Solid Surface option boasts the functional and hard wearing traits that NEXUS Club New York required.

The satin anodised aluminium fittings are discreet, while the stainless steel mortice locks are machined flush into the door and pilaster rebates - enhancing the aesthetic and user privacy. The restroom's locks are complete with DDA compliant indicator bolts that incorporate the emergency release facility, which is essential for the safety of members in such a high energy environment.

Meanwhile, the 30mm ceiling clearance and 10mm floor clearance, with satin anodised aluminium coated floor blocks, guarantee the security and privacy of all members while they use the fitness club's restrooms; making Sylan Solid Surface the ideal choice for this project.

Venesta are delighted to have been a part of this exciting and exclusive project in the heart of New York and are pleased to continually play a part in serving and delighting NEXUS Club New York members through the restroom solution provided.
